LEXICON

A WORD-HARVESTING BATTLE GAME

A Simple Demonstration of Gameplay

THE CONCEPT

BATTLESHIPS MEETS SCRABBLE

Lexicon is a turn-based strategy game where your vocabulary is your greatest weapon. Mash up the deductive tension of hidden grids with the resource management of word building.

Blind Warfare

Two players face off on hidden 10×10 grids. You can't see their tiles, and they can't see yours.

Harvesting

Fire shots to "hit" enemy tiles. Every successful hit adds that letter to your personal Letter Bank.

Word Bombs

Spend your collected letters to launch powerful attacks. The longer the word, the bigger the blast.

Pure Strategy

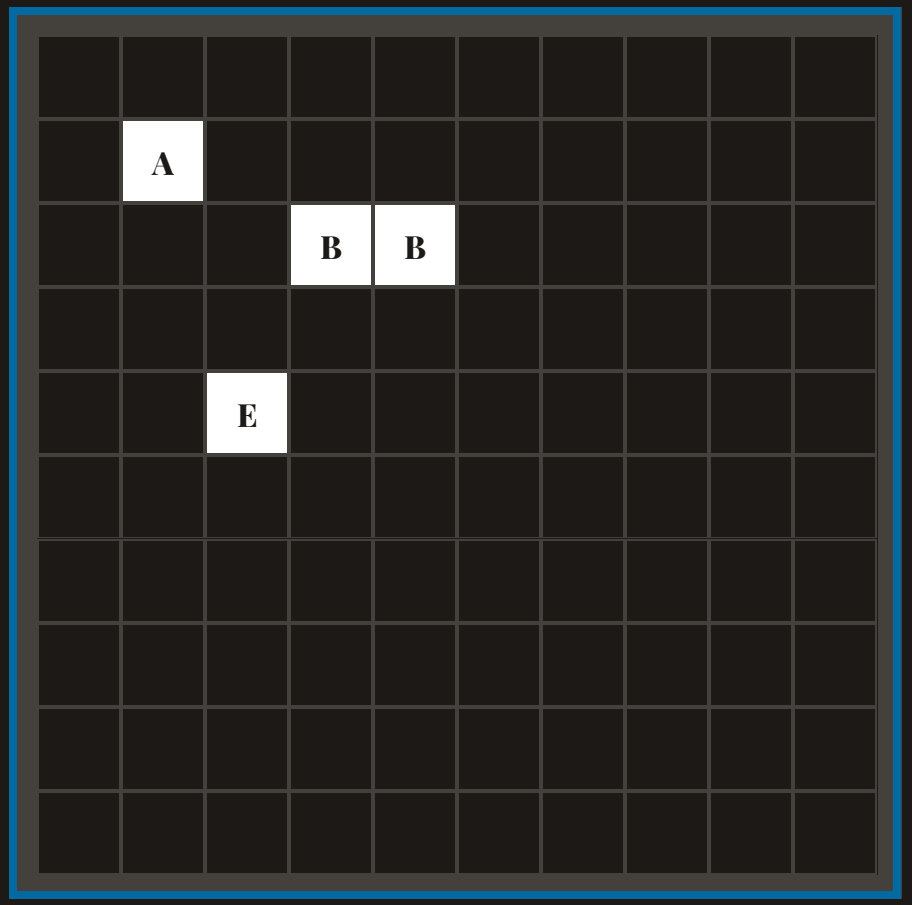
Balance between firing for more letters or spending them for tactical board control.

SETUP

BUILDING YOUR HIDDEN FORTRESS

- **The Grid:** A 10×10 battlefield (A-J, 1-10).
- **Secret Placement:** Each player secretly places 15 Letter Tiles.
- **Orientation:** Tiles can be horizontal or vertical.
- **Buffer Rule:** Must have a 1-cell buffer (no touching tiles!).
- **Vowel Minimum:** At least 3 vowels must be placed.

YOUR HIDDEN 10x10 GRID

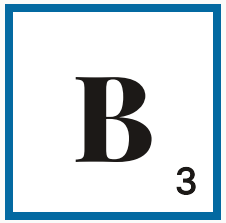


KNOW YOUR TILES

COMMON

E, A, I, O, R, T, N, S

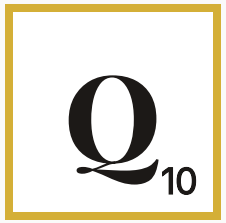
Standard 1×1 single cell tiles. The foundation of your vocabulary.



UNCOMMON

B, C, D, F, G, H, L, M, P

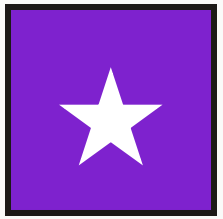
1×2 double cell tiles. Hit both cells to earn a **Bonus Draw**.



RARE

J, K, Q, V, W, X, Y, Z

1×1 single cell tiles. These count **double** in word scoring.



WILDCARD

ANY LETTER

Max 1 per player. Can substitute for any letter in a Word Bomb.

FIRING

HARVESTING YOUR RESOURCES

Choose a Target

On your turn, call a coordinate (e.g., "D7") on the enemy's hidden grid.

The Miss

If the cell is empty, it's marked as a miss. Your turn ends immediately.

The Hit

If you hit a tile, the letter is revealed and added to your **Letter Bank**.

Every hit is a double victory: you've damaged the enemy's fleet AND gained a vital resource for your own future attacks.

Strategy Tip: *Target areas where you suspect high-value letters (like Q or Z) are hidden to boost your Word Bomb potential!*

THE LETTER BANK

YOUR ARSENAL OF WORDS

Private Storage

Every letter you harvest is stored in your private bank. Your opponent knows **how many** letters you have, but never **which** ones.

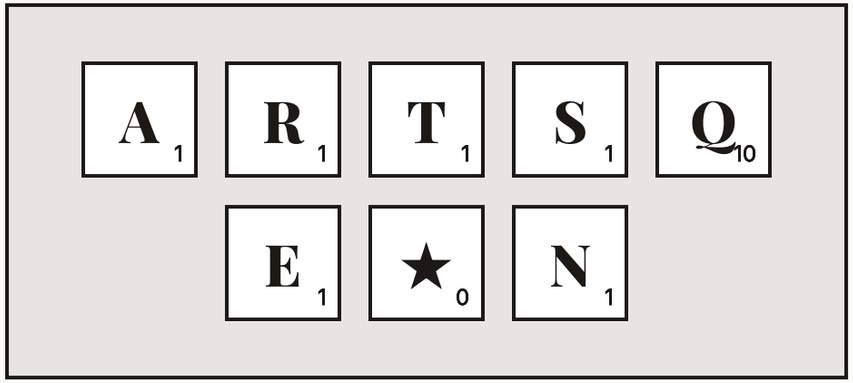
Attack Currency

Letters are the "currency" used to cast Word Bombs. Once a word is played, those letters are consumed and removed from your bank.

The Bluffing Layer

Hoard letters for a massive 8-letter attack, or spend them early to disrupt your opponent's plans. Your bank size is a key psychological tool.

CURRENT LETTER BANK



WORD BOMBS

TURNING VOCABULARY INTO WEAPONS

Instead of a standard shot, you can declare a Word Bomb on your turn.

Word Bombs are special attacks that use the letters you've harvested. They don't require coordinates—they target the board based on the word's length and power.

SCALING POWER: The longer the word, the more devastating the attack!

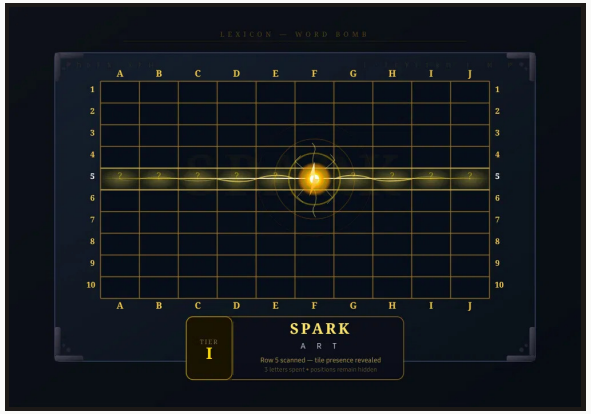
1. Type a valid word using letters from your Bank.
2. System validates the word against the dictionary.
3. Letters are spent and removed from your Bank.
4. The corresponding Word Bomb effect is triggered!

TACTICAL STRIKES

WORD BOMB TIERS: 3 TO 5 LETTERS

Spark
3 LETTERS

Intelligence Gathering: Reveal whether any tile exists in a chosen row OR column. A simple "Yes/No" to narrow your search.



Blast
4 LETTERS

Precision Strike: Hit any 1 cell of your choice. No guessing required—perfect for finishing off a known tile.

Surge
5 LETTERS

Full Recon: Reveal all tile positions in one full row OR column. Turns the tide by exposing the enemy's formation.

HEAVY ATTACKS

WORD BOMB TIERS: 6 TO 8+ LETTERS

Storm
6 LETTERS

Area Damage: Hit every cell in a 2×2 area of your choice. Perfect for clearing clusters of suspected tiles.

Tempest
7 LETTERS

Intercept: Steal one random letter from your opponent's Letter Bank! Disrupt their plans while building your own.

Obliterate
8+ LETTERS

Total Destruction: Destroy every tile in a full row OR column simultaneously. The ultimate game-ending strike.

SPECIAL TILES

EXPECT THE UNEXPECTED

Vault Tile

Requires **two hits** to harvest. The letter is only collected on the second hit. Perfect for protecting high-value letters.

Poison Glyph

A trap! If hit, the attacker must immediately **discard one random letter** from their bank. Disguises as a real tile.

Mirror Tile

When hit, the attacker gains a copy of the letter, but the original tile **remains on the grid** and is not destroyed.

Charged Tile

If this is the last tile destroyed in its entire row or column, the attacker immediately gets a **free bonus shot**.

WINNING THE GAME

THREE PATHS TO VICTORY

Classic Mode

Pure Battleships logic. Be the first player to destroy all 15 enemy letter tiles.

Lexicon Mode

A vocabulary race. Be the first player to successfully fire an 8-letter **Obliterate** bomb.

Hybrid Mode

The best of both worlds. Win by destroying 10 enemy tiles OR firing a 7+ letter bomb.
